SUNCOURT®

CENTRAX®
CLOTHES DRYER BOOSTER

DRYER **BOOSTING** KIT

MODEL: DRY04

ENERGY EFFICIENT

MET® c US E115518

ENGINEERED & ASSEMBLED IN USA

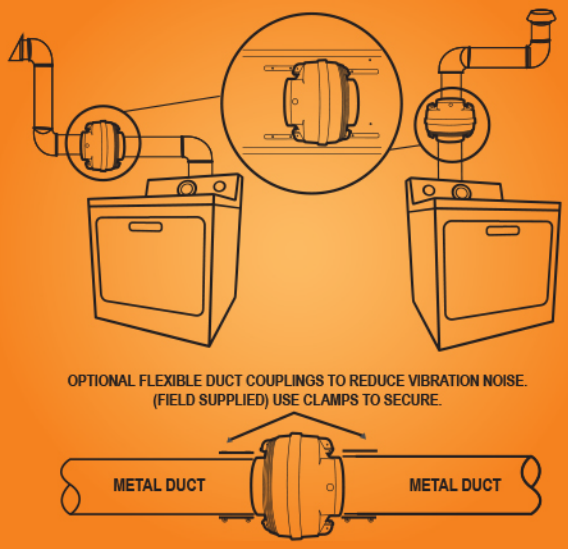

SHORTENS DRYING TIME!

Solve residential electric dryer vent problems by supplementing the fan in your dryer to enhance it's efficiency.

The Suncourt Dryer Boosting Kit comes with an accurate, reliable current sensing switch that turns the fan on and off when it senses current from the dryer. Current sensing is more reliable than pressure switches used in other dryer boosting applications. Stack effect, wind and installation can interfere with the operation of pressure switches by starting the fan unnecessarily or simply not turning the fan on when required.

- For use in a duct with a total equivalent length of 25 feet to 140 feet.
- Shorter drying time with long dryer duct runs
- Less wear and tear on the dryer
- Reduced lint buildup inside dryer and duct
- Thermal overload protection and features an automatic reset
- Current sensing switch
- 5 Year Limited Warranty

WARNING: The Suncourt Dryer Vent Kit is only approved for installation for electric clothes dryers.
